Sheryians Coding School

HTML • CSS • JavaScript • Gsap  
SwiperJs • Bootstrap • Tailwind-CSS

## EXPERIENCE

### WEB DEVELOPMENT INSTRUCTOR

sheryians coding school

Mar 2023 - December 2023 | Bhopal, MP

- **Web Instructor at Sheryians Coding School:** Led classes for numerous students, imparting essential web development knowledge and practical skills, significantly contributing to their academic and professional growth.

- **YouTube Educator:** Produced and shared a wide array of educational content on web development, reaching a broad audience and enabling them to enhance their coding abilities and technical understanding.
- **Innovative Project Developer:**

Created complex, interactive websites with advanced technologies like GSAP, Locomotive Scroll, and canvas technology, delivering exceptional user experiences and showcasing technical prowess.

- **Fast Learner and Experienced Educator:** Rapidly assimilates new technologies and concepts, effectively integrating them into teaching methodologies, thereby greatly enriching the learning experience for students.

## PORTFOLIO

### HAVE A VISIT ON PORTFOLIO

- Created a dynamic and responsive portfolio website using React, TailwindCSS, and Framer Motion, showcasing projects, skills, and achievements with smooth animations and modern UI design for optimal user experience.

## SELECTED PROJECTS

### Todos

ReactJs, Context Api and TailwindCSS

A responsive React Todo app with CRUD features, smooth animations, modern UI styling using TailwindCSS, and local storage persistence.

### Dynamic Routing

ReactJs, React router and TailwindCSS

A responsive React app with dynamic routing, smooth animations, nested routes, modern TailwindCSS styling, and API Handling.

### Theme Changer

ReactJs, Context Api and TailwindCSS

Designed and implemented a theme-switching feature, providing users with light/dark mode options for a customized and accessible browsing experience.

### Currency Converter

ReactJs, React Hooks and TailwindCSS

Created a responsive currency converter application using React and Context API for state management, ensuring precise functionality and a seamless user interface.
